

## Build services

### Structured and cost-effective network deployments

Sometimes, unexpected issues can complicate even the simplest optical network deployments, costing time, effort and resources. Our Build services offer strategies and solutions to significantly improve cost efficiencies.

At ADVA, we believe in a structured approach to network deployments. We support you from the very start, asking the right questions and offering solutions where necessary – either our standard or premium solution to fit your specific requirements.

### Your complete solution

#### ✓ Pre-installation

Our experts use comprehensive planning and their extensive experience to ensure that all possible issues are covered (e.g., insufficient cabinet space or incorrect power supply). We will equip you with all the information you need to deploy your optimum network – and get it right first time.

#### ✓ Installation

All network equipment is commissioned, provisioned and rigorously tested. Our technicians and contractors are fully qualified to deliver onsite deployment. All off our engineers are trained to the strict ADVA-standard installation and commissioning protocol.

#### ✓ Post-installation

Collected deployment data, such as network diagrams, inventory data and test results are handed over in a single document for customer sign-off. Consistent quality is maintained across all installations, significantly reducing time to market.

## What you get

What you get	Standard deployments Rack and stack only	Bespoke deployments Standard plus optional chargeable services
Design		<ul style="list-style-type: none"> <li>• DCN</li> <li>• Router configuration</li> </ul>
Back office	<ul style="list-style-type: none"> <li>• Installation coordination</li> <li>• Billing</li> </ul>	<ul style="list-style-type: none"> <li>• Project management</li> <li>• Bespoke billing</li> <li>• Fast-track lead time</li> </ul>
Pre-installation documents	<ul style="list-style-type: none"> <li>• Statement of work</li> <li>• Risk assessment</li> <li>• Deployment checklist</li> </ul>	<ul style="list-style-type: none"> <li>• Method of procedure</li> <li>• Statement of work</li> <li>• Risk assessment</li> <li>• Deployment checklist</li> </ul>
Pre-configuration	<ul style="list-style-type: none"> <li>• ADVA kit pre-configuration</li> </ul>	<ul style="list-style-type: none"> <li>• Specific pre-configuration               <ul style="list-style-type: none"> <li>• ADVA kit</li> <li>• Routers, etc.</li> </ul> </li> </ul>
Hardware delivery	<ul style="list-style-type: none"> <li>• Network kit is delivered to site on the day of installation</li> </ul>	<ul style="list-style-type: none"> <li>• Network kit to be delivered in accordance with customer requirements</li> </ul>
Installation	<ul style="list-style-type: none"> <li>• Trained and certified engineers</li> <li>• Standard               <ul style="list-style-type: none"> <li>• Cabinet layout</li> <li>• Labelling</li> <li>• Testing (test kit provided)</li> </ul> </li> <li>• Realtime technical support</li> <li>• Waste disposal</li> </ul>	<ul style="list-style-type: none"> <li>• Trained and certified engineers</li> <li>• Bespoke               <ul style="list-style-type: none"> <li>• Cabinet layout</li> <li>• Labelling</li> </ul> </li> <li>• Extended and non-standard testing</li> <li>• Real-time technical support</li> <li>• Waste disposal</li> <li>• Onsite staff training</li> <li>• Client fibering</li> <li>• Cabinet install</li> <li>• Mechanical and electrical work</li> <li>• Site access management</li> </ul>
Post-installation documents	<ul style="list-style-type: none"> <li>• Network acceptance</li> <li>• Handover documentation</li> </ul>	<ul style="list-style-type: none"> <li>• Network acceptance</li> <li>• Customized handover documentation</li> </ul>
Professional services		<ul style="list-style-type: none"> <li>• Network migration (lift and shift)</li> <li>• Site surveys</li> <li>• Site-specific risk assessments</li> </ul>
