

Classroom training on basic theory of time and frequency, synchronization concepts, principles, technology.

Objective

A training course which provides a general overview of network synchronization based on PTP.

Level: Introductory

Please note: the training will be provided using GoToTraining application or other tool – we will arrange a short test of the tool upfront the training – you will get invited for both – test and training session.

Please note: recording of the remote training sessions is not permitted

Benefits

- To get the understanding to maintain a network according to the ITU standards
- Small group, 8 attendants maximum

Agenda

9am to
5pm

THEORY

- The need of synchronization
- Characterizing synchronization quality
- Synchronization distribution layers
- GPS and mixed synchronization solutions
- Norms and standards

PRACTICE

Theory only; no practical sessions;

Audience

Project managers, systems engineers, network operations staff of telecommunications operators and / or integrators.
