

Training services

Keep your team current

Helping your staff maintain their knowledge is as important as preventative maintenance itself. Let ADVA train your team and keep them current as technology advances. Our trainers will prepare you for those times when experience is critical.

Do you rely on your team as first responders on networking issues? Is speed in problem solving your most important response metric? We can help you be your best. Periodic training with ADVA will keep your team up to date as innovation progresses and new solutions are developed.

Your complete solution

- ✔ **Balance**
We deliver professional training sessions with a healthy mix of theory and hands-on practice.
- ✔ **Flexibility**
Not all students are at the same place on the learning curve. Tell us what you need most and we'll customize classes for you.
- ✔ **Global access**
ADVA has five training centres to serve you : Atlanta (USA), Meiningen (Germany), York (UK) , Singapore and Poland. Or our Training experts can come to you to deliver the class at your premises.
- ✔ **Full equipment portfolio coverage**
Our standard offering of classes covers our complete portfolio of products, including DWDM, Ethernet and timing. We can dive as deep as you need on any product.
- ✔ **Turning knowledge into competence**
Are you interested in becoming an ADVA-certified expert? Participate in our ADVA certified expert program available online. The certificate is valid two years and can be renewed.

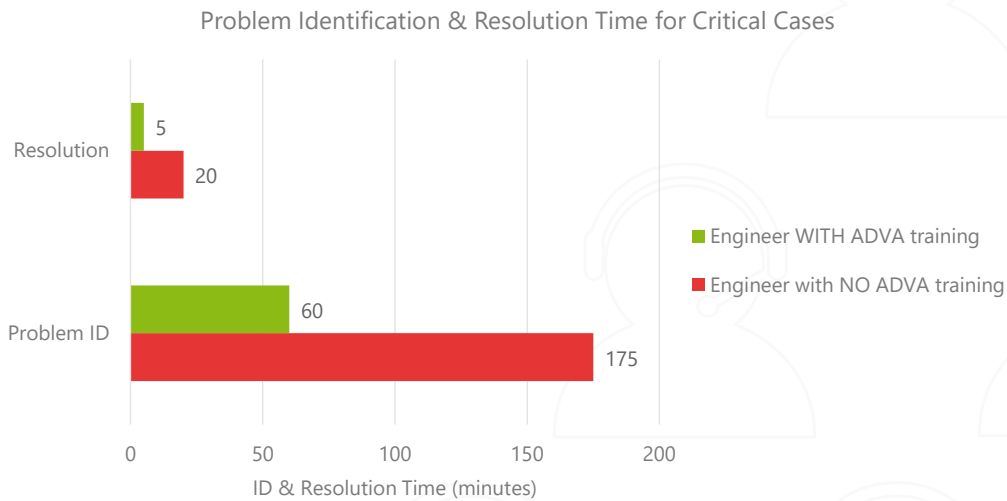

What you get

Case study: resolution time for critical cases reduced by 75%

Customer

- Network fault occurs between two nodes
- High attenuation is causing power level to drop to a minimum
- Operations staff begin troubleshooting

Why it makes sense

- Trained staff have been taught ADVA-specific troubleshooting techniques
- No more guesswork; problems are easily identified and eliminated
- Resolution commands are tailored to symptoms
