IBM Compatibility Matrix

Notes:

- RoCE is for SMC-R use
- FICON is supported via cascaded directors (ISL)
- For dispersion compensation, only 'Fiber Bragg Grating' based compensation is supported
- RSM and OPPM based protection/restoration is available for all modules

* QuadFlex module is used only as a transport card for OpenFab (MA-2C5LT) multiplexer signals, there was no direct client support for QuadFlex tested.

The official IBM qualification letter is available on request, please use the web form
